

International ACH Transactions: Where are We Now?

Description:

It has now been four months since the IAT transactions became effective. Reflecting back, were you adequately prepared for the September 18, 2009 deadline? Hopefully your answer to that question is yes and that this ended up being a non-event. Have you wondered how we handled this industry-wide?

The speaker of this session will not only provide a review of IAT transactions but will also provide an update of how the industry fared. The speaker will also provide the most up-to-date statistics by reviewing how many IAT transactions actually went through the network since this was one of the greatest unknowns prior to September 18, 2009.
