

Best Practices in Internet & Mobile Banking Fraud Protection

Description:

As Internet banking quickly expands into mobile banking, so does the rate of potential fraud via phishing, forged checks, and hacks into the network. Although FFIEC guidelines have helped financial institutions guard against online attacks, fraudsters continue to seek new channels to infiltrate. In this presentation, you will learn the latest strategies in fraud detection and prevention to help protect your institution and its most important asset, your customers, against fraudulent activity.

Jason Marshall, Harland Financial Systems
