

Managing IT Risk Through Governance

Description:

Financial Institutions are under considerable pressure to cut costs in the current economic environment. With a widespread lack of capital for costly upfront investments & growing regulatory requirements, the opportunity to outsource becomes an attractive way of financing your technological investments, and in many cases, an important strategic plan for your institution.

Jessica Walpole, Diebold

Bio:

Jess Walpole, director, enterprise governance and compliance is responsible for providing security oversight and advisory services on a global scale for Diebold, Incorporated. Additionally, she focuses on the creation of pragmatic enterprise risk metrics and comprehensive GRC management programs for the enterprise. In this capacity, she works closely with both customers and government regulatory agencies to ensure that Diebold has an appropriate program in place that satisfies requirements as outlined by SOx, GLBA, and PCI.

Walpole joined Diebold in 1995 as an internal auditor and has held positions in finance, IT and enterprise security. She holds a bachelor's degree in finance and business administration from Malone University in Canton, Ohio, and maintains the following professional certifications Certified Information Systems Auditor (CISA), Certified Information Security Manager (CISM), and Certified in the Governance of Enterprise Information Technology (CGEIT).
