

Merchant Capture Audit

Description:

Merchant capture will be reviewed from a high-level perspective and then key audit steps will be identified which must be performed to ascertain whether controls are in place to secure the transactions.

Loras Even, RSM McGladrey

Bio:

Loras Even is a managing director with the Technology Risk Management Services. He brings more than 28 years of experience in information technology, which includes 11 years of focusing on security. Loras specializes in network security assessments for regulated clients. Loras has directed the security assessment practice for a variety of industries, including financial institutions, health services, manufacturing and government.

Loras began his career in 1981 as a field engineer with a minicomputer firm, where he later became a lead engineer for the eastern Iowa district and served as a project manager for a large Beta PBX test site.

Loras later joined a regional Bell operating company as a technical design consultant to assist customers in designing and implementing a regional WAN. This WAN used a wide range of technologies, including ATM, frame relay and SONET-based services.
